

**SEEBURGER Business Integration Suite (BIS) – The Hybrid Integration Platform**

**One Platform for Full Life Cycle API Management  
and Any Integration Requirement**

# The Hybrid Integration Platform to Drive Your Digital Transformation

Today, companies wishing to remain competitive and continue growth look to IT for solutions. At the same time, as companies like yours continue the digital transformation journey, integration is more important than ever. You must be prepared to take advantage of opportunities brought by cloud services, mobile apps, new technologies and the ability to build more relationships with customers and partners, faster. To get the full benefit of going digital, to promote information-sharing, and to drive innovation across the organization, you must seamlessly integrate all of your systems, applications, cloud services and business partners.

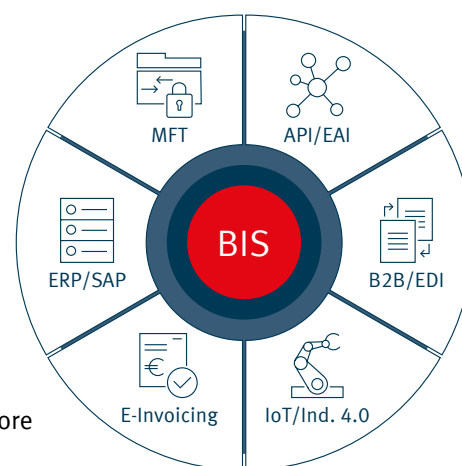

***Our answer: ONE platform to support ALL your integration needs!***

---

## Your Central Platform for Digital Transformation – SEEBURGER Business Integration Suite (BIS)

Ensure the secure, continuous flow of information across your business networks, with SEEBURGER Business Integration Suite (BIS). BIS allows you to access all your data anywhere in real-time, enabling maximum process efficiency and control, on-premise or in the cloud. The core platform includes:

- ✓ **Managed File Transfer (MFT)**  
Secure transmission of data between systems and/or people
- ✓ **API/EAI**  
Connect applications and cloud services in real time
- ✓ **B2B/EDI**  
Industry-standard and controlled exchange of documents
- ✓ **IoT/Industry 4.0**  
Integrate equipment, systems and devices into business processes
- ✓ **E-Invoicing**  
Predefined country-specific regulations and compliance, reporting and more
- ✓ **ERP/SAP**  
Connection to any ERP system seamlessly, agile SAP Integration

---

## Unlock the Value of Digital Transformation With the SEEBURGER Business Integration Suite

### **Gain control of internal and external business processes**

This single, scalable, unified platform allows you to consolidate all of your processes to transmit data securely and efficiently. This ensures improved and harmonized business processes within your value chain.

### **Win more business, faster**

Connect new business partners faster, ensure processing of increasing business volumes simply, and bring new products into the sales channels at the right time. SEEBURGER BIS is the platform for your flexibility, growth and agility.

### **Respond quickly to changes within your company**

SEEBURGER BIS makes it simple for you to implement new company structures or to seamlessly integrate new business units after an acquisition. Regulatory requirements are implemented faster, without errors, and your business partners' networks are supported more efficiently.

### **Improve collaboration between IT and business departments**

With technical and business views of your digital processes in real time, you are able to seamlessly react to the constantly changing information requirements of your various business units and partners.

# SEEBURGER Business Integration Suite – Experience the Difference

MFT	API/EAI	B2B/EDI
<p><b>Secure transmission of data between systems and/or people</b></p> <ul style="list-style-type: none"> <li>Securely exchange documents adhoc – with no file size limits</li> <li>Securely integrate internal and external applications and data across any environment</li> <li>Automate file transfer between systems and people</li> </ul>	<p><b>Connect applications and cloud services in real time</b></p> <ul style="list-style-type: none"> <li>Connect internal and external applications in real time</li> <li>Seamlessly integrate cloud applications (i.e. Salesforce, payments applications, shop solutions) with ERP or other applications</li> <li>Make your own services accessible to business partners (API integration and management)</li> </ul>	<p><b>Industry-standard and controlled exchange of documents</b></p> <ul style="list-style-type: none"> <li>Rapidly establish connections to all EDI/B2B partners while adhering to industry standards</li> <li>Integrate smaller-scale partners via WebEDI, PDF, eInvoice, etc.</li> <li>Securely exchange engineering files (CAx)</li> </ul>
ERP/SAP	E-Invoicing	IoT/Industry 4.0
<p><b>Connection to any ERP system seamlessly, agile SAP Integration</b></p> <ul style="list-style-type: none"> <li>Seamlessly integrate into any ERP</li> <li>Ensure agile SAP integration (tRFC, BAPI, HCI/HCP, PI/PO)</li> <li>Support all SAP ERP systems from R/3 to SAP S/4HANA®</li> </ul>	<p><b>Predefined country-specific regulations and compliance, reporting and more</b></p> <ul style="list-style-type: none"> <li>Establish E-Invoicing with customers and suppliers</li> <li>Support any E-Invoicing government mandate (SII, ChorusPro, FatturaPA etc.)</li> <li>Save between 60 and 80% of cost compared to a paper-based process</li> </ul>	<p><b>Integrate equipment, systems and devices into business processes</b></p> <ul style="list-style-type: none"> <li>Integrate legacy machines and systems to secure past investment</li> <li>Support the new industry 4.0-standard OPC-UA</li> <li>Build a bridge between the “things” of the real world and your business IT</li> </ul>

With BIS, you get unprecedented flexibility to integrate B2B/EDI, MFT, e-invoicing, IoT, API and EAI applications into any ERP system. Our focus is on five elements essential for a successful digital shift:

**Improvement of usability** – User interfaces offer separate views for different user roles, from integration experts to business users. In the DevOps area, API interfaces and automation tools support agile delivery of integration content, especially in the cloud.

**Expanded integration capabilities in a secure, scalable and agile way** – whether cloud, Big Data, Blockchain, IoT or API integration - digital change continuously poses new integration requirements, and BIS introduces enhanced API management and a set of new integration adapters to address your needs.

**An integration platform equipped for the future** – BIS sets new standards in terms of performance and operating efficiency. This investment in the future is strengthened by a Java runtime environment provided by SEEBURGER.

**Cost efficiency in operation** – With BIS, all routine procedures in operation can be automated, from software installation and regular software updates to the import of processes, mappings and configurations. API interfaces enable integration into the user’s own familiar environment.

**Flexible operating models** – Whether on-premises as in-house operation, in the SEEBURGER cloud or in public cloud environments such as AWS, Azure, etc. – with BIS customers can determine their optimum operating model.

# Recognized for Its “Ability to Execute and Completeness of Vision”

Gartner Magic Quadrant 2019 for Full Life Cycle API Management<sup>1</sup>

**Gartner**

“

We are honored and pleased to be recognized by Gartner for Full Life Cycle API Management. To us, this recognition is a major milestone as part of the ongoing SEEBURGER business strategy and innovation of the SEEBURGER Business Integration Suite.

*Matthias Feßenbecker, CTO, SEEBURGER AG*

”

## SEEBURGER’s Innovation

With approximately 10,000 customers, operating worldwide, SEEBURGER provides API Management as part of a comprehensive hybrid business integration platform.

SEEBURGER BIS is a business integration platform that takes a blended approach to integration on-premises, in hybrid setups or in the cloud/as an iPaaS; it supports B2B/EDI, MFT, e-Invoicing, IoT, API and Enterprise Application Integration (EAI) use cases, relevant HIP capabilities and pre-packaged industry solutions (Open Banking etc.).

## SEEBURGER API Management includes:

- **API Integration** – Enables you to mediate APIs for cross-platform compatibility, with any content and protocol. SEEBURGER supports all message and content based patterns, REST, SOAP, FTP, AS2, XML, JSON, http header content, etc. You have no boundaries regarding backend systems, formats or message size.
- **Security** – Protect APIs at all levels: interface, access and data
- **End-to-end Life Cycle Management** – Manage API lifecycle from creation to end-of-life
- **Control and Governance** – Monitor API operations and analyze API usage for insight
- **Administration** – Self-service API consumption, easy API administration
- **Monitoring and Reporting** – Monitor API operations and analyze API usage for insight
