SEEBURGER successfully ISO 27001:2013 re-certified

BRETTEN – As part of a successful re-certification of ISO / IEC 27001:2013, SEEBURGER has now received an additional certification for its office in Sofia Bulgaria, called the TÜV certificate for “Approved Method,” which certified the underlying business processes of the B2B Managed Services operation.

The recertification demonstrates once again that SEEBURGER Business Integration effectively adheres to the highest quality standards for safeguarding security, availability and integrity of sensitive customer data.

The recertification process again sharpens quality and risk awareness of SEEBURGER employees and – attests to corporate transparency, process reliability and security, as well as active risk management.

Within the scope of the assessment, SEEBURGER was evaluated both for its operational processes such as event management, incident management, change management, go-live management, business continuity management (BCM) and disaster recovery (DR); and for the security of its facilities and IT infrastructure, which includes testing of anti-virus management, capacity management, user and access management, backup and restore, and DR and BCM processes. Through the extension of the ISO certification to the Sofia location and through its commitment to yearly re-certification, SEEBURGER AG underscores the significance of security and quality within the company.

“Security is handled with the utmost importance in all SEEBURGER solutions, regardless if they are deployed on-premises or within private, hybrid or shared cloud services hosted in our ISO certified data centers,” states Bernd Seeburger, CEO of SEEBURGER AG.

About SEEBURGER

SEEBURGER is a global provider of business integration and secure managed file transfer (MFT) solutions. All solutions are available on premise and as cloud services. SEEBURGER Business Integration Suite enables companies to streamline business processes, reduce operational costs, facilitate governance and compliance, and provide visibility to the farthest edge of the supply chain to maximize ERP effectiveness and drive new efficiencies. All solutions are delivered on a unified, 100% SEEBURGER-engineered platform that lowers the total cost of ownership and reduces implementation time. With over 25 years in the industry, SEEBURGER ranks among the top business integration providers by industry analysts. As a

long-standing certified SAP partner, SEEBURGER offers turnkey solutions to map, regulate, and control SAP processes. With over 10,000 customers such as Barilla, Bosch, HD Smith, Hapag Lloyd, Intersport, Linde, Magna, Osram, Siemens, Tetley, s.Oliver, RWE and Volkswagen, SEEBURGER customers benefit from expertise in over 15 industries in more than 50 countries with 21 offices located in Europe, Asia Pacific and North America.
